biblioteca funciona

Felipe Bomfim

Full Stack Developer at Link Monitoramento
Curitiba, Paraná, Brasil

Resumo

I'm passionate about technology and innovation and that's what
motivates me to learn and constantly develop myself in my
programming skills.

I'm a full stack developer with over than 3 years of experience
creating pages, API, offering support to clients and among others,
always looking forward to work on meaningful projects.

As an assiduous self-taugh developer, I look to comprehend and
learn new things every day.

I've been studying mobile languages, like kotlin, flutter and swift. I
already made some webviews, but I would like to develop full native
apps and work with mobile developement in a near future.

I like to exchange knowledge. I've been studyng others languages
and frameworks to always expand my expertise.

Tools: Jira (Australiana Atlassian), PHP, MySQL, JavaScript, Jquery,
HTML, CSS, TortoiseSVN, Postman.

Experiência

Link Monitoramento
